Finally! A high-end display frame worthy of a presence in upscale lobbies, restaurants, hotels, exhibits, places of worship, funeral homes, catering halls or other public places. Make eye catching customized displays of your menus, welcome signs, posters, directories, schedules or any messages. The Plexi-glass window over either a velour lined panel or a neon wipe-off panel, easily slides in or out of the frames inner track. The track is accessed via the exclusive Glaro Lif-Top feature which works on concealed hinges. No open slots or locks are necessary. These stunning display frames add an air of excellence to your facility.

Fluorescent /Neon Marker Dry Wipe-Off Displays

Bright and lively vivid colors make a presentation sparkle. Be creative or just write your message. Glaro Neon Wipe-Offs are an effective marketing tool. Just draw, write and create your display with the colorful fluorescent markers (sold separately below), allow to dry, place the Plexi-glass window over the panel and insert into the frame. They are excellent for menus, specials, promotions, and notices. They are also excellent tools for the classroom or other group presentations. Assembly allows for either landscape or portrait positioning of the frame.

Deluxe Multi-Purpose Displays With Black Velour Back Panel

These displays feature a 1/8" thick solid backing panel lined with luxurious black nylon velour. The velour will hold your printed material in place when sandwiched between the velour backing panel and the Plexi-Glass window and inserted into the frame. The contrasting black velour covering serves as an attractive soft looking mat for areas not covered by display material. This display also features Glaro's Lif-Top design to easily change your message. Assembly allows for either landscape or portrait positioning of the frame.
